GREEN TIP OF THE MONTH - December - 2019

Most of know we should recycle our plastic water bottles. But there are some things we may not be aware of. The lids can be recycled, but they must be put back on the bottle otherwise they may jam the sorting machines. Here at Jenkins place we are going to start collecting the water bottle lids to donate to a local church that recycles them. Look for collection containers we will use. The other thing we need to do is to remove the plastic labels on the bottles because they too will jam the machines. Also, squash the bottles to save room in the collection containers as well.
